

ADVANCED BATTERY POWER 2019 IN AACHEN

The two-day English-speaking symposium Advanced Battery Power is hosted by the Haus der Technik together with the battery research institutes ISEA - Institute for Power Electronics and Electrical Drives at RWTH Aachen University and MEET Battery Research Center at Münster University and has now become one of the leading events involving the subject of battery technology. The professional significance reaches far beyond the subject of automobile use and makes Advanced Battery Power a compulsory event for all engineers, researchers and developers who are involved with energy storage devices in general, new materials, network integration or battery recycling.

We are looking forward to seeing you in Aachen!
