

CV – Jan Girschik

Jan Girschik is a scientist and head of the research group Battery Development at the Fraunhofer Institute for Environmental, Safety and Energy Technology UMSICHT. He has studied mechanical engineering and focused his research on innovative electrochemical reactors. He is involved in various national and international projects in close cooperation with SMEs, large enterprises and other research institutions. Girschik is a member of the organizing committee of the International Flow Battery Forum and initiator and coordinator of the Electrochemical Cell Concepts Colloquium E3C.
