

## **Vita**

Mirco Ruttert studied chemistry at the University of Münster and did his PhD in the group of Prof. Dr. Martin Winter at the MEET Battery Research Center. In his thesis he developed new anode materials for the use in high-energy lithium-ion batteries. As part of his work as a research assistant, he also worked on an industrial project funded by BMWi.

Mirco Ruttert is involved in more than 10 scientific publications.

Since January 2021 he is coordinating the publicly funded projects at E-Lyte Innovations GmbH.
